The following is an examiner's statement of reasons for allowance: the prior art of record (Boros, 6,615,024) fails to teach a method of estimating a downlink channel between a base station and a mobile terminal in a mobile telecommunication system, comprising estimating at the base station an uplink channel between the mobile terminal and the base station; deducing, from variations in the estimated uplink channel, variations in the downlink channel; making an initial estimation of the downlink channel at a first instant; and estimating at a second instant the downlink channel from the initial estimation of the downlink channel at the first instant and the deduced variations in the downlink channel between the first and second instant as substantially described in independent claims 10, 12 and 16. These limitations, in combination with the remaining limitations of claims 10, 12 and 16, are not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
